

# PRINCE2<sup>®</sup>:2009 Project Board Seminar

**Audience** Senior managers and directors who may be required to fill a role on a PRINCE2 Project Board.

**Prerequisites** There are no prerequisites other than an awareness of project work in the delegate's own business environment.

**Objectives** PRINCE2 is a comprehensive, structured project management method used extensively by UK central government departments, local government and, increasingly, commercial organisations in the UK and internationally. The method can be applied to all kinds of project including information systems projects. This intensive seminar outlines the business benefits of PRINCE2 and provides an overview of the method. It also focuses on the key decision-making processes which enable a Project Board to direct a PRINCE2 project effectively. The course takes a hands-on approach through the use of case study material which is normally tailored to meet delegates' business environments.

The course will enable delegates to:

- Recognise the business benefits of using PRINCE2
- Use the key PRINCE2 management documents and processes to direct a project

**Duration** **Half-day**

## Course Content

- Background & scope of PRINCE2
