

Project in a Box (Benchmark Edition)

We've been looking for a piece of support software that's flexible enough to really make the most of PRINCE2® for years. Now we've found one – and it's free! All delegates on our PRINCE2 courses receive a CD with the Benchmark Community Edition of PROJECT in a Box, the world leader in PRINCE2 management software.

Project in a Box

All the products in the PROJECT in a Box range of software provide you with the same core capabilities. It's a knowledge management system tuned to match your needs. Using an interactive version of the PRINCE2 Process model you can set up and manage the documents you need for any kind of project. The software comes with a full set of blank PRINCE2 templates and a Glossary. The Benchmark edition includes examples of the key PRINCE2 documents – including the P.I.D, Project Quality Plan and Job Descriptions - used to manage the £0.9m project which is used as a case study in our examination courses.

PROJECT in a Box also takes care of version control, sharing and archiving. By taking away the burden of managing documents, it frees up your time to do the real job of managing your projects. So you can now show your customers and colleagues that you really are applying PRINCE2 professionally.

The Flexible Solution

Most organisations find that once they come to understand PRINCE2 they want to change it, sometimes in subtle ways and sometimes significantly to match more precisely their needs, practices and organisational culture. Most of the current PRINCE2 products on the market rigidly follow the PRINCE2 process model, its key management products and workflow into their solutions making it a time consuming and expensive activity to tailor the methodology to suit you.
